

NOTES ON CONTRIBUTORS

PHILIPPE ACHILLEAS is Professor in public law at the Jean Monnet Faculty (Law, Economics and Management) at Université Paris-Saclay. He manages the master's degree in Space and Telecommunications Law (DAST) and is Director of the Institute of Space and Telecommunications Law (IDEST – Université Paris-Saclay). He is a specialist in space and technology law and has been committed to building bridges between disciplines and cultures for over twenty years.

BALÁZS BARTÓKI-GÖNCZY, PhD is Associate Professor of law and Director of the Budapest-based Institute of Aerospace and Telecommunications Law, founded in 2020. Together with his team, they have authored more than 80 scientific papers and five books on space law and policy. He leads several successful international research projects on space law and policy. His institute serves as the national contact point for the European Centre for Space Law, with which they have organised numerous professional events in recent years. He is also a member of the International Institute of Space Law and has been advising Hungary's delegation at UN COPUOS and UN CD PAROS. In this capacity, he has served as a judge in the European finals of the Manfred Lachs Space Law Moot Court for many years.

CHARLINE COUDRY holds a Master's Degree in Space and Telecommunications Law from Université Paris-Saclay. Her research focuses on space and cyberspace law, with particular interest in international humanitarian law, and *jus ad bellum*. Since joining the Université Paris-Saclay PhD Track programme, she has been affiliated with the Institut Droit et Régulation des Technologies (IDRT) Space and Cyberspace team, where she is now pursuing doctoral research on the law of neutrality in new areas of conflicts.

JUSTINE DOUSSET is a PhD researcher working on public-private partnerships in the European space program at the research institute IDRT Space and

Cyberspace, Université Paris-Saclay. She previously worked as a research intern at the European Space Policy Institute and as a trainee in the Legal Department of CNES. She holds a Master's Degree in European and International Business Law from Sorbonne Law School and a Master's Degree in Space and Telecommunications Law from Université Paris-Saclay.

ANDRÁS EDL is a researcher, space defense and security advisor at the Institute of Aerospace and Telecommunications Law of Ludovika University of Public Service, Budapest. His background is in history and East Asian studies. Currently, he is finishing his PhD studies at the Doctoral School of Military Sciences of Ludovika University of Public Service and the European Security and Defence College. His research focuses on the space activity of the U.S., China, Russia and the EU while also examining related questions of supply chain security, deterrence, technology development and the Moon programs.

MÓNIKA GANCZER is an international lawyer conducting research on international and domestic regulation of space activities of non-governmental entities. She is Associate Professor at Széchenyi István University, a Research Fellow at the Hungarian Academy of Sciences Centre for Social Sciences Institute for Legal Studies and an external researcher at Ludovika University of Public Service Institute of Aerospace and Telecommunications Law. She has been involved as a lecturer in the UniSpace postgraduate program since 2023.

QUENTIN GUÉHO is a PhD student at Université Paris-Saclay (PSU), at IDRT Space and Cyberspace. He is writing his thesis on military activities in outer space and is a reservist within the French Air and Space Force's Space Command (CDE). He is a lecturer in constitutional law at the Jean Monet Faculty (PSU). He is a member of the AJCDS and is organising an academic conference in June 2026 on the regionalisation of space. He brings his expertise to the CNES through the association AeroDecarbo.

BARBARA HORVÁTH is a PhD candidate at Széchenyi István University in Győr and a Research Fellow at the Institute of Aerospace and Telecommunications Law of Ludovika University of Public Service in Budapest. Her research focuses on space law, particularly the legal aspects of the protection of dark and quiet skies, large satellite constellations and environmental aspects of space activities. She has actively participated in several international academic programmes and competitions in the field, including the Manfred Lachs Space Law Moot

Court Competition and the ECSL Summer Course on Space Law and Policy. She gained practical experience in international and space law at the Ministry of Foreign Affairs and Trade of Hungary, as well as at the Hungarian Institute of International Affairs. She is also actively involved in international professional organisations, including the ILA, SGAC, IISL and the IAU CPS.

BOUDOUR MEFTEH is a space law researcher and PhD candidate at the University of Debrecen and IATL. She has contributed through publications, conference presentations, and interdisciplinary teaching in space law. She specialises in space governance, focusing on emerging legal gaps and critical issues. She serves as SGAC SLP Research Coordinator, Co-Lead of the Lunar Governance Working Group, and policy intern at the Hungarian Academy of Diplomacy's Public Policy Mentorship Program.

Lieutenant Colonel ENDRE MISZORI is a Hungarian military intelligence officer, defence and space policy expert with more than 35 years of NATO, EU and U.S.-led operational experience. Former fighter pilot turned all-source intelligence professional, he specialised in GEOINT and Space-Based ISR (SBISR), serving from tactical end-user level through operational command assignments to strategic HQ and policy-making roles. Former Principal Adviser of NACGI, he served at CENTCOM, EU SatCen, NIFC, SHAPE, and currently at NATO CFSpCC. Certified EO/SAR imagery analyst, published author and multinational operational leader.

HUGO PETER holds a PhD in Space Law with a dissertation entitled "The Legal Framework Governing the Weaponization of Outer Space: Legal and Institutional Challenges". His research focuses on space security and military uses of outer space. He is now Associate Professor at the French Air and Space Force Academy. Prior to this position, Hugo Peter was a Postdoctoral Researcher at Université Paris-Saclay, where he worked on the legal aspects of the REACTS project of the European Commission.

GÁBOR SÜLYÖK is Full Professor at Széchenyi István University, a Senior Research Fellow at the Hungarian Academy of Sciences Centre for Social Sciences Institute for Legal Studies, and an external researcher at Ludovika University of Public Service Institute of Aerospace and Telecommunications Law. He also serves as the Head of the Doctoral School of Law and Political Sciences at Széchenyi István University. He conducts research in various fields of space law, including space sustainability and the military use of outer space.
